

Boosting Kindergarten Enrollment (Marketing Guides Book 1)

Marketing Guides seeks to deliver relevant knowledge to you in a practical, friendly and hands-on way. How to Boost Kindergarten Enrollment is the first of a series of practical Marketing Guides, designed to give SMBs hands-on knowledge for identifying and remedying problems regarding your business activities. As a result of optimized marketing strategies, your business should experience a sense of well-being in the form of sustainable growth and change. Marketing activity never ends, but the point of course is to invest in efficient marketing activities. This guide deals with the sales process an oftentimes neglected aspect of business. The improvement of which will ultimately result in boosting your kindergartens enrollment. We have constantly heard of kindergarten managers who believe that the key to getting good enrollment rates is good leads. This is misguided. In most cases actually, the amount of leads that an average preschool receives is more than enough; what is really needed is translating these leads into genuine sales. This is an often overseen matter that we seek to correct. We present here practical solutions that we have seen effective firsthand, and relevant case studies in both public and private kindergartens that we have conducted ourselves. This practical guide refers exactly to the points that you need to improve, and seeks to give you insight into how to practically address them. We have written the book to contain the most basic concepts in doing better marketing, but in such a way that it is specific enough to address key problems individually. We hope you would find this a useful balance.
