

School Governance: Policy, Politics and Practices

The recent Trojan Horse scandal, in which twenty-five Birmingham, UK, schools were investigated following allegations that school governors were imposing a hard-line Muslim curriculum, raised important questions not only about school governance, but also about the future of a democratic system of education in England. Taking the Trojan Horse scandal as a starting point and drawing on her own experience as a school governor, Jacqueline Baxter examines what implications these questions will have for the newly elected British government. By examining the political, social, and economic contexts surrounding education in 2015, *School Governance* offers keen insights into pressures and challenges engendered by the current system and what these challenges may mean for English education in the twenty-first century.
