100% of beta readers who finished the whole book found mentors within 6 months

50% of Beta Readers who finished part 1 now have a mentor!

Over the past 2 years we have interviewed mentors around the world to collect their insights on how to find and keep mentors. Combining the stories from over 25 accomplished leaders with the experience gained from coaching over 20,000 leaders in 15 countries, we have written a practical guide to help people find the best mentors and keep them. We selected 20 people from the 150 who applied to become Beta Readers. Over the course of a month they read and feedback every single of the 80+ exercises in the book. I expected it to be a book about the authors experiences, but I got so much more in terms of the reflective exercises and it helped me get on the right track. Its fantastic because it gives you the preparation above and beyond what you need in terms of approaching someone. It definitely gave me more confidence to approach someone. The book is like god-send! It gave me so much more than I expected! It is not like a regular book but it has a pool of exercises to help you think and reflect. - Codruga Stephaniga

Im also reading other mentoring books, and I found this book very different from others because of its reflective questions. Those questions are very useful as it helped me question myself on how I can improve and what I should do. Now, I always ask myself how exactly I need help with and have a specific problem in mind whenever I meet my mentor. This book is a great mentoring tool where we can find different resources to reflect and understand why mentors want to mentor and how they can

help us, in terms of career or other parts of our lives. I really enjoyed reading the book! - Joseph Fong Invest in Yourself & Find The Mentors You Want
